

EPOCHE Stack — Hash Manifest (v1.0)

This document provides a complete integrity record for the EPOCHE Stack (multi-document interpretive framework).

Each file listed below is version-locked and hashed using SHA-256.
Any modification to a file will result in a different hash.

This manifest exists to preserve structural and component-level integrity across distributed mirrors.

Stack Scope

The EPOCHE Stack is a multi-document, non-operational, non-authoritative interpretive framework.

This manifest applies to all documents included in the stack as published and archived.

Integrity Note

This manifest is the authoritative integrity reference for the EPOCHE Stack.

- Each listed hash corresponds to a specific file version
- Files are read-only and version-locked
- Any change requires a new version and a new manifest

Removal or alteration of this manifest breaks cross-document verification.

Status

Version: v1.0 (Initial Manifest)

Change Policy: Immutable upon publication

Posture: Non-authoritative · Non-operational · Interpretive only

Scope Clarification

This manifest:

- does not define standards or compliance
- does not enforce behavior
- does not provide guarantees
- does not function as a control or verification system

It exists solely as a public integrity reference.

All interpretation and use remain the responsibility of human judgment.
